Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner proposed changes to claim 6 to make it clear that the formulas are used in the method of forming a pneumatic radial tire. Examiner also proposed correcting minor informalites in claim 6, correcting the dependency of claim 9, changing the title, and deleting the prior art legend in figure 1 since page 4 of specification describes figure 1 as being a cross section profile of a tire of the invention. Applicant's representative agreed to the changes set forth in the examiner's amendment.
